

Humanities and Social Sciences courses in SSH

A. Definitions

- i. **Humanities** courses teach analytical, critical and interpretive skills necessary to understand the world around us. These courses aim to help students understand human beings as historical beings who create ideas, art, cultures and societies in order to express the human condition. The goal of these courses is to give students the skills to understand and appreciate the complexities and perspectives of human beings.
- ii. **Social sciences** courses teach analytical, critical and interpretive skills necessary to explain the world around us. These courses aim to help students explain the behaviour of human beings, in their activities, groups, institutions and societies, through the collection, analysis and interpretation of data. The goal of these courses is to give students the skills to explain the complexities of human behaviour.
